

# New & Improved for 2018 Narrow Linear Gen2

## Narrow Linear LED Series Complements Any Design

The NL line is one of the slimmest LED luminaires LaMar makes: at only 2.25" wide, these fixtures can fit discreetly into almost any architectural application.

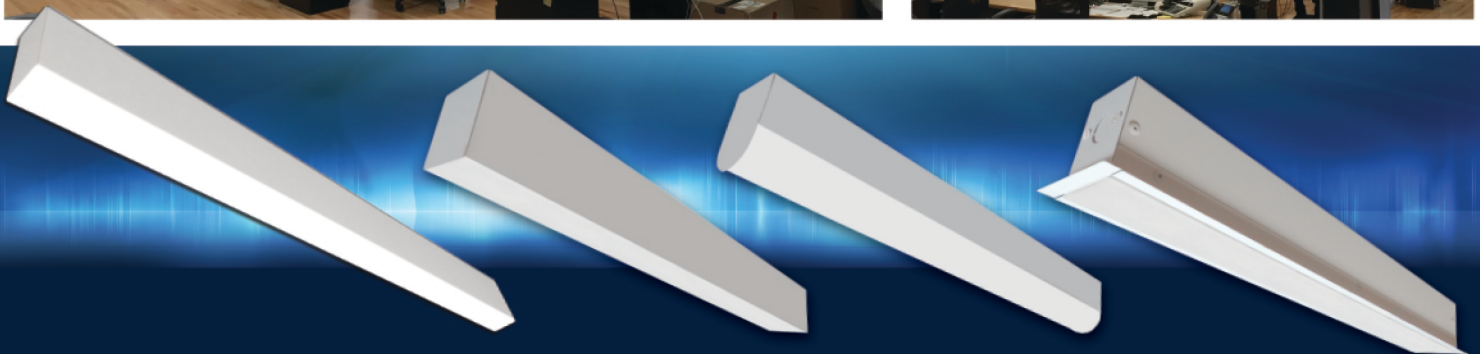

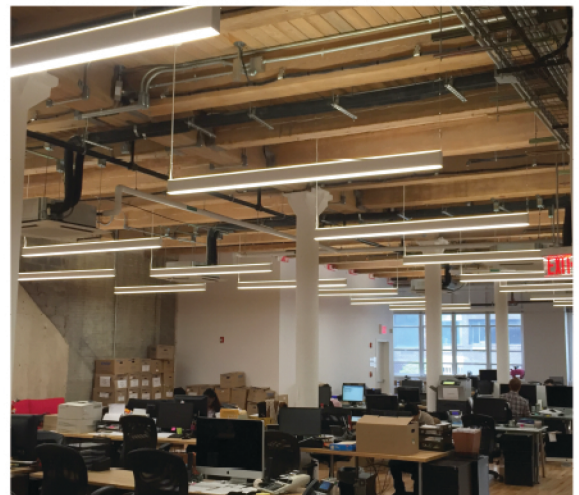

Comprised of three product groups, the Narrow Linear Wall (NLW), Narrow Linear Surface (NLS) and the Narrow Linear Recessed (NLR), this product line is ideal for retail, office, educational facility or architectural applications with most being suitable for continuous row installations (up & along a wall [90° angle] or suspended from ceiling).

They are available in 2', 4', 6' & 8' lengths (nominal) as well as in custom colors. The NL series is an economic alternative to extruded aluminum versions and features a high efficiency extruded diffuser for excellent light transmission, even illumination and best of all, **No LED Hot Spots**.

3 Standard light levels / Custom driver tuning available upon request

Available with 0-10V Dimming, 0-10V 1% Dimming, or Dim to off
